Afternoon Art Classes in 2025 (CCSA)

Architecture

This class helps students to learn architecture design, develop their problem solving skills, and also improve their creativity. The teacher teaches architectural concepts focusing on the history of architecture, model buildings, space design, creative thinking, planning, forms, shapes, sustainability, etc. Moreover, students have ample opportunities to put everything they learned into practice by involving in hands-on activities.

By the end of this class, students will learn:

- Model building
- Key concepts of architecture
- Plan designing
- Form techniques

Details:

Sculpting

This specialized sculpting class allows our students to work with a variety of materials to create three-dimensional objects. Our skilled instructors will guide students through the fundamentals of sculpture, teaching them basic techniques such as sizing, volume and carving. They will then apply these skills to make their sculpture pieces. Instructors will provide students with regular feedback throughout the making process.

By the end of this class, students will learn:

- Making simple shapes and forms
- Sculpting techniques
- Working with different mediums
- Aesthetic
