Science Club

Whether observing bubbles to understand surface tension, or visualizing how sound waves reverberate using lengths of string, we unravel complex concepts with fun and illustrative weekly experiments.

From many different branches of science—the physics of flight, the chemistry of photosynthesis, the biology of terrarium life—we connect students with the scientific workings of the world around them.

Our course is designed to accommodate a wide range of students. Its experiments are clear, engaging and easy to follow for scientists of any age. More experienced groups analyze their findings in greater depth and discuss real life application of the scientific principles involved.

Grades 1-3

Thursday After School

Mar-27 to May-29

3:00 to 4:15

\$295.00 +HST

ECONOMIC INCLUSIVITY

Every child is able to participate in our programs, regardless of a family's economic circumstances. If cost is a barrier, parents may register their children and pay less, or even nothing with no questions asked. Details available at registration.
